PROFESSIONAL SUMMARY

UTS Bachelor of Information Technology Co-op student currently supporting **enterprise procurement systems, contract data analysis, AI chatbot testing and process automation** at the Reserve Bank of Australia. Brings hands-on experience using technology, stakeholder communication and clear documentation to improve business processes.

CORE COMPETENCIES

Stakeholder Support

Process Improvement

UAT & System Testing

Data Analysis

Compliance Documentation

Workflow Automation

Microsoft Office

AI-Enabled Tools

WORK EXPERIENCE

Reserve Bank of Australia July 2026 - Present

Information Technology Intern

Sydney, Australia

- Supported the business-requirements matrix for the ReadyTech Contract Management System and verified vendor delivery against RBA standards.
- Analysed **more than 1,200 contracts** for data inconsistencies and quality issues before loading them into the ReadyTech Contract Management System.
- Contributed to defect investigation and fixes for Procura, the RBA's internal procurement AI chatbot, wrote its standard operating procedure, and developed regression and stress tests that produced UAT insights.
- Conducted a feasibility study that automated retrieval of D-U-N-S numbers for **more than 800 suppliers** and resulted in partial operational use.
- Conducted a feasibility study into using AI to automate the creation of interactive quick reference guides for the ReadyTech Contract Management System.
- Conducted a feasibility study of an AI-based email triager that classified Procurement Operations mailbox messages by responsible handler and project.
- Developed an automated Jira workflow report that extracts status history and shows how long each issue remains in stages including UAT, reducing manual data collection and report preparation.
- Developed a script to analyse weekly desk-booking and office-attendance patterns, supporting workplace-use analysis.
- Used Excel to analyse UAT insights and prepare financial data for transfer into a new enterprise platform, supporting data quality and consistency.
- Built AI-powered Microsoft Power Automate workflows for business automation that increased efficiency and saved time.

Jortel Communications January 2026 - July 2026

Research and Development Engineer

- Piloted a Cloudflare-hosted AI automation and agent system for an external product concept, connecting multiple data sources and AI integrations through Model Context Protocol.
- Piloted AI-integrated Microsoft Office add-ins for Outlook, Excel and PowerPoint with application-specific functions for each workflow.
- Evaluated emerging tools and systems to inform strategic technical decisions and expansion opportunities.

Self-Employed January 2026 - Present

Private Tutor

- Provide personalised academic support in English, Mathematics and Commercial Studies.
- Deliver detailed assessment feedback and targeted study strategies, helping students improve grades by **5-10%**.

Customer Service Team Member

- Managed front-counter customer service during busy periods, serving **more than 100 customers in an hour**.
- Resolved customer complaints and escalated issues appropriately during high-pressure service periods.
- Trained two new customer service team members while maintaining service and efficiency standards.

PROJECTS & ACHIEVEMENTS

RBA PeopleSoft Journal-Approval Feasibility Study

Designed and developed a feasibility study for a standardised PeopleSoft journal-approval process using Microsoft Power Apps and SharePoint Lists to explore easier future data management.

Microsoft Power Apps, SharePoint Lists

UTS Cybersecurity Society's CSECcon V

Supported the UTS Cybersecurity Society's full-day conference by helping recruit and coordinate speakers, preparing the schedule and serving as an MC; the event attracted **337 attendees**, 20 speakers and 10 sponsors.

Stakeholder and event coordination

UNSW AI for Progress Hackathon - Eye-Disease Detection Prototype

Integrated the model into a website and contributed to the presentation and business case as part of a team that won third place and the People's Choice Award at the 2025 UNSW AI for Progress Hackathon.

Website integration and business case

EDUCATION

Bachelor of Information Technology (Co-op) University of Technology Sydney

February 2026 - December 2028 (expected)

Sydney, Australia

Co-operative Scholarship recipient in a course for high achievers with leadership potential, combining study with two six-month industry placements.

AWARDS & HONORS
